AI Foundry
Creating the Future-Ready and Frictionless Digital One Office

## Digitally Transforming Banking and Lending Operations

AI Foundry, a Kodak Alaris business unit, digitally transforms banking and lending operations by utilizing technology, data and people in new, more efficient processes. Our Agile Solutions create a "Digital One Office" by integrating both the front- and back office; reducing loan processing times by 50%. Using cutting-edge AI technology including machine vision, machine learning, and intelligent robots to achieve unprecedented levels of automation, our solutions reduce costs. Organizations who deploy our solution are better able to adapt to changing market conditions, manage compliance and drive unparalleled bottom-line improvements.

Our goal is to bring your organization into the future, giving you a competitive edge in a digital age that won't wait for you to catch up.

Our mission is to put your data to work, so that you can extract the most value from it every day.

We are focused on the future. We help banking and lending organizations take control of their future by shaping their now. For many organizations, the now is inefficient, with too many documents, manual error, and people involved in one process. AI Foundry changes that. We believe that the front office and back office should not function independently.

Instead, we rethink organizational silos and create the Digital One Office to streamline operations and provide a great customer experience. In turn, customer interaction, satisfaction, and loyalty increases allowing organizations to separate themselves from their competitors. We transform your organization into a future-ready business by automating manual processes, classifying and extracting data, and increasing productivity.

Automatically Populate Loan File
All processed documents are attached to the binder and exported back to the LOS loan file.

Direct Connection to LOS
The Agile Mortgage solution connects directly to your LOS and ingests documents for classification and extraction.

Exception Handling
Validate the classification and extraction of the documents. Alerted of exceptions to be resolved in an intuitive UI.

Agile Mortgages Solution

- Insights & Decisioning
- Document, Capture & Analyze
- Classify & Extract
- Workflow
- Validate
- Deliver

Actionable Intelligence Lifecycle

Actionable Intelligence empowers organizations to easily discover, analyze, and manage both structured and unstructured data in both on-premises and cloud-based locations. Organizations can use the data to achieve a multitude of benefits including: reduction of risk associated with personal or confidential information, streamlined processes and significant cost savings. Our end-to-end approach to data modernizes the way enterprises identify, understand, manage, and govern their data like never before.

Actionable intelligence combines cutting-edge technology, expertise, and data science to identify relevant patterns, derive insights, facilitate decision-making, and define actions that deliver a competitive advantage. We leverage the latest artificial intelligence and user-guided machine learning capabilities to help companies maximize the value of their digital data to improve their overall business outcomes.

Key features of Agile Solutions:

Leading Edge Technology

With our solutions documents are processed as part of a higher-level entity, like loan packages. Exploiting the metadata and knowledge associated with those entities will deliver significantly higher overall business value along with improvements in classification, extraction, and data accuracy rates.

Fast Learning & Ability to Adapt Capabilities

Utilizing the latest in AI and computer-vision techniques our Agile solutions learn all document types quickly and accurately and create the necessary workflow processes.

Workflow Automation

AI Foundry's next generation platform and business rules engine is used to monitor completeness, integrity, and compliance of data flowing through the system and can make actionable inferences early in the document processing and exception handling phases helping to reduce the overall cycle time.

Integrated RPA

Integrate hundreds of business workflow rules within a single customizable environment -our software robots go several steps beyond typical narrowly focused RPA capabilities.

Exception Handling

On occasion, there is a need for human intervention of the automated RPA-type processes. A highly optimized and task specific UI speeds up the review process of key manual tasks such as document separation and validation of extracted data.

Scenarios

Agile solutions from AI Foundry empower organizations to streamline processes and help employees make informed business decisions.

AIM Solutions can help in:

- Mortgage origination
- Retail, wholesale and correspondent lending
- Mortgage onboarding, servicing and loan modification
- Securitization of loans for secondary markets
- Commercial lending/leasing
- Small business banking/SBA loans
